

WWS WINDOW WASHING SYSTEM

FRESH WATER TREATMENT SYSTEM

CLEAN WINDOWS

The system supplies wheelhouse with pressurised tempered water including cleaning detergent and rinsing fluid. The system is specially designed to suit the number of spraying nozzles, which is dependent on the size and design of the wheelhouses and yards, or owners request.

After use the water is removed from the pipe system by adding pressurised air.

The system is equipped with a PLC for fully automatic operation of the system controlled from the wheelhouse e.g. start or stop working on the chosen section.

Anti-freezing liquid is optionally supplied.
